(10) International Publication Number
WO 2004/048632 A3

- [Continued on next page]*

A cross-sectional view of a multi-layered structure 90. The structure consists of three main layers: a top layer 96, a middle layer 94, and a bottom layer 95. The top layer 96 and the bottom layer 95 are filled with diagonal hatching lines. The middle layer 94 is a thin layer with a different hatching pattern. A label 89 points to the interface between the top and middle layers. A label 97 points to the top surface of the top layer. A bracket on the right side of the structure indicates the overall thickness or height of the layers 96 and 94, labeled as 90. Another bracket on the right side indicates the thickness of the bottom layer 95, labeled as 92.

(57) Abstract: Method and Apparatus for efficiently applying a bond coat (94) and related coating systems (90) to a surface that can survive the thermal gradient that is encountered in very high temperature, high heat flux environments such as a rocket engine. An apparatus for efficiently applying coating systems (90) using a vapor or cluster deposition technique such as a directed vapor deposition (DVD) approach, and more particularly providing a thermal barrier coating (TBC) system applications with very high temperature utility in either oxidizing or non-oxidizing conditions.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/37485

A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : C23C 14/30

US CL : 427/596,255.23, 255.7, 454, 455, 456; 204/192.16, 192.22; 118/715, 723EB; 428/627, 632, 650, 653, 67

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 427/596,255.23, 255.7, 454, 455, 456; 204/192.16, 192.22; 118/715, 723EB; 428/627, 632, 650, 653, 678, 680

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"

document member of the same patent family
